

2021 in Review

The past year at the Petrie-Flom Center has been marked by growth and continued thought leadership.

We secured generous grants to launch two new, path-breaking research initiatives: Diagnosing in the Home: The Ethical, Legal, and Regulatory Challenges and <u>Opportunities of Digital Home Health</u> and the <u>Project on Psychedelics Law and Regulation</u> (<u>POPLAR</u>). These projects already have made significant scholarly contributions in publications ranging from <u>Nature Medicine</u> to the <u>Journal of Law, Medicine & Ethics</u>, reached the public through <u>high-profile events</u>, and shaped <u>policy</u> and national <u>media coverage</u>.

Amid the ongoing COVID-19 pandemic, the Center continued to influence the national conversation on public health law and ethics. Center affiliates' scholarship and commentary was featured in leading media outlets, including <u>ABC News</u>, the <u>Associated Press</u>, the <u>BBC</u>, <u>Bloomberg</u>, the <u>Boston Globe</u>, <u>CBS</u>, <u>CNBC</u>, the <u>New York Times</u>, <u>NPR</u>, <u>STAT</u>, <u>Time</u>, the <u>Washington Post</u>, and more. A full list of our extensive media commentary is available <u>here</u>.

Our blog, <u>Bill of Health</u>, is another outlet through which we share timely scholarship and commentary in an accessible format. Our coverage of the pandemic has anticipated key issues, including <u>legal challenges to vaccine mandates</u>, the threat of <u>new viral variants</u>, and public health <u>messaging concerns</u>. In the past year, <u>Bill of Health</u> published over 340 posts and received record-breaking traffic, with over a quarter million views in August alone. In addition to our daily coverage of the pandemic, we have welcomed guest editors to host focused <u>digital symposia</u> on topics including <u>Recommendations for a Biden-Harris Health</u> <u>Policy Agenda</u> (edited by Erin Fuse Brown) and <u>Health Justice: Engaging Critical</u> <u>Perspectives in Health Law and Policy</u> (edited by Ruqaiijah Yearby and Lindsay Wiley).

Our public outreach continued in 2021 through our extensive events programming. The Petrie-Flom Center offered a vast array of events to a global audience on a weekly basis, covering a variety of topics, from <u>health care workers' pandemic experiences</u>, to <u>medical</u> <u>racism</u>, to <u>legal challenges to abortion access</u>. These events receive up to 400 unique live views, and continue to inform and engage viewers through our captioned recordings <u>posted</u> <u>on YouTube</u>.

Overall, 2021 was a year of successful launches and exciting work for the Petrie-Flom Center. We look forward to continuing our robust research, events, and communications initiatives in the coming year. Thank you for your interest and engagement with our work. We wish you a happy and healthy new year.
