

Could psychedelics help to treat substance use conditions? Join us for a [webinar](#) on March 19th, which will provide an overview of psychedelic treatments, including ibogaine and psilocybin, for substance use conditions. In this [panel discussion](#), an ibogaine researcher, a certified recovery coach with lived experience, and a drug law expert will discuss existing research, potential benefits and risks, ongoing policy and legal reforms, and societal implications.

Interested in learning more about psychedelics? Stay tuned for details about how to apply for **Psychedelics Bootcamp 2024**, a three-day intensive training at Harvard Law School on legal, ethical, and policy issues surrounding psychedelics in medicine and society. Participants will learn the information and skills necessary to become thought leaders in the field of psychedelics, and examine critical perspectives. Applications will open soon. For the most up-to-date information, check our [website](#).

The Beginning of a Bad TRIP – Alabama’s Embryonic Personhood Decision and Targeted Restrictions on IVF Provision

Targeted restrictions on IVF Provision – or TRIP laws – stand to rob patients of their ability to build their families by compelling physicians to provide less effective, more expensive care.
